VACUUM PACKAGING MACHINES

Shrink Tunnel

ST-2000 SHRINK TUNNEL

This fully automatic shrink tunnel is all made of stainless-steel including the belt. Steam or electrically heated, it features adjustable speed and top & bottom shower. Its unique steam extraction system captures the vapors so, no steam will be exhausted in your packaging room.

Microprocessing Controls

MC-30

The MC-30 conventional microprocessor panel offers 9 adjustable programs; quick vacuum stop and gas flushing control. The easy touch splash proof front panel digitally indicates all functions programmed.

MC-40

The latest MC-40 control allows 30 adjustable programs and features the latest sensor controlled packaging technology. Vacuum level and gas flush level are automatically managed in percentage. Packaging consistency is maintained by the new control panel and guarantees your customers freshness and quality products. Error code diagnostic of vital functions makes it service friendly. Cycle and hour counter are standard features.

SIPROMAC: A WORLD OF LEADING

Single Chamber

MODEL 250, MODEL 350 & MODEL 350D

These three table-top models are ideal for limited spaces. Economic and professional, they are recommended for hotels, restaurants, convenience stores, butchers and supermarkets. Stainless-steel with see through lid construction.

MODEL 450-T

This larger table-top unit is the ultimate model with a greater distance between seal bars and its stainless-steel construction.

MODEL 450-A & MODEL 550-A

These large and robust single chamber, floor model machines are mounted on wheels and are designed and built for the industry. They can be used to pack many different meat, poultry, fish and cheese products.

VACUUM PACKAGING MACHINES

Double Chamber

MODEL 420-A

This small double chamber machine is ideal for supermarkets and small processors. Its stainless-steel industrial construction and design makes this machine especially reliable in today's retail industry.

MODEL 600-A, MODEL 620-A

Very popular throughout the world, these industrial machines offer the best features available. The stainless-steel deck design is user friendly and offers more versatility with its 4 sealing bars.

Automatic System

MODEL 650-A

Ideal for packaging large products such as fresh meat, 40 lbs cheese blocks, frozen blocks, etc. Ask your local distributor for your best choice of our industrial units.

(Shown with optional casters)

MODEL 700-A

This automatic vacuum packaging system features an automatic cover movement and two deck mounted "take away" pneumatic conveyors. A rear conveyor also allows products to be automatically transferred into our stainless-steel shrink tunnel. Only one operator is needed to operate this system which can save thousands of dollars in operating costs. Call us today for more details.
