- PROVEN COST SAVINGS

**ROAD MAINTENANCE
INVENTORY CONTROL AND
MATERIAL USAGE SOLUTION**

LOADRITE®

THE INTELLIGENT ROAD

The LOADRITE® Road Boss™ combines the easy to use LOADRITE® weighing system, with powerful reporting software that enables you to manage your inventory, track your usage per lane mile, and optimize your operations.

THE ROAD MAINTENANCE PRODUCT MANAGER

The LOADRITE® Road Boss™ has been tested to withstand even the most rugged environments. Operators track truck loads using the large, easy to use buttons and back-lit screen on the in-cab console. Coupled with powerful reporting software, Road Boss™ allows you to optimize your operations.

LOADRITE's Road Boss™ Material Management System (MMS) software gives you the ability to capture load data for further analysis. You can rapidly generate reports from your PC, enabling you to track stockpile inventory, report on product usage per lane mile, your truck loads, and much more.

INVENTORY CONTROL

Track your stockpiles within 1% accuracy and report on the amount of product in any stockpile at any time.

TRUCK PRODUCTIVITY

Track your truck's product usage per lane mile, the number of loads per event, and optimize your product usage to the least amount of material to get the job done.

EVENT REPORTING

Report on the amount of product used in an event, snow or ice storm. For example, how many tons of product and miles your truck's have covered.

CONTRACTOR REPORTING

Built-in reports provide you with accurate tracking of your contractor's road miles covered and product used, giving you the ability to bill for their services.
